

# Mythe

## Set-Up:

- Open the board and put the dragon on the highest space and the cheese on the last space.
- All player pieces (mice) go in the enclosure, and each player takes the matching card.
- Based on the number of players, remove cards from the deck if playing less than 5 players. (Look for the 4+, 5)
- Youngest player starts. Deal out all cards to all players face-down, some players might get less cards.
- May look at your hand, but keep hidden

## Game Flow:

- Starting with the first player and going in clockwise order, players will draw cards from other player's hands then give cards when they stop drawing cards until 1 player has won the sacred cheese!
  - **Phase 1: Drawing Cards**
    - Draw one card face-up from any player's hand. Text is flavor for the story only.
    - Choose to continue to draw cards risking an obstacle, or choose to stop and advance.
    - If you choose to stop and advance, add up all the points you accumulated and move forward based on the dots on each space. Spaces with hero's pieces are considered "0" for movement.
    - Only 1 adventurer per space. Can't save adventure points or choose not to move if able.
    - Moving onto the space with the dragon (1 point of movement) can only be done if you have a "Legendary Item" in your hand (which you can't use for the number, obviously since it is in YOUR hand). By doing this, you kill the dragon and win the sacred cheese!
    - If at any point an obstacle (skull) is drawn, drawing ends and you can't advance.
  - **Phase 2: Giving Cards to other players**
    - Regardless of whether you advanced or busted, you will now give away cards.
    - Take all the cards you draw into your hand with the cards you already had, decide which cards (if any) you want to give away, and distribute them face-down.
    - All players must have at least 1 card before your turn can end.
    - Advanced Variant: Only give away cards you draw, not card you had in your hand.

## End Game:

- Once 1 player is able to get onto the dragon space (1 movement) with a "Legendary Item" in their hand, they defeat the dragon and take the cheese! Victory is theirs!
